

Planet Waves RCA connectors are available in three different styles to meet the needs of specific installations. All Planet Waves Connectors are specially designed to work with Planet Waves 3/16" coaxial cable.

ST Series connectors have 24-karat gold plated contacts for excellent conductivity and lowered risk of oxidization. These connectors also feature a black chrome finish.

BC Series connectors are nickel plated with a standard chrome shell. These connectors, like the ST, are a single-piece design.

Planet Waves HD Series (RCAP50) are the original Planet Waves connector design, featuring a die-cast body with 24-karat gold plated contacts.

All connector packs come with extra colored rings for color-coding connectors by application.
